Product	Description	Health and Fire Hazards
Natural Gas	<p><b>Leak:</b> Gas</p> <p><b>Vapor:</b> Lighter than air. Very flammable and a white vapor cloud may be visible near the site of the leak.</p>	<p><b>Health:</b> Extremely high concentrations may cause irritation or asphyxiation.</p> <p><b>Fire:</b> Extremely flammable and easily ignited by heat, sparks or flames.</p>

**ABOUT COLORADO NATURAL GAS (CNG)**

We operate nearly 1,337 miles of distribution and 6.5 miles of transmission in the Colorado Natural Gas (CNG) service area.

Natural gas is an important source of energy for America’s homes and businesses. CNG is privileged to provide energy to our customers in Colorado by transporting natural gas through a network of underground pipelines. Year after year, pipelines prove to be one of the safest and most reliable modes of energy transportation. CNG is dedicated to the continued safe operation of our pipelines for your protection and the protection of the environment. We are committed to an outstanding safety record. We maintain 24-hour surveillance and perform routine inspections, computer monitoring, corrosion protection, maintenance/testing programs, and employee training.

**WHAT DOES CNG DO IF A LEAK OCCURS?**

To prepare for the event of a leak, CNG regularly communicates, plans and trains with local emergency responders. Upon the notification of an event or leak, CNG will immediately dispatch trained personnel to assist emergency responders.

CNG personnel and emergency responders are trained to protect life, property and facilities in the case of an emergency.

CNG personnel will also take steps to minimize the amount of leakage and to isolate the pipeline emergency.

**MAINTAINING SAFETY AND INTEGRITY OF PIPELINES**

CNG works hard to maintain the integrity and safety of our pipeline systems. We stay in touch with industry and government organizations to monitor potential threats and study new technologies that will help keep our facilities as safe and secure as possible.

Neighbors like you can help us maintain a safe, secure and reliable pipeline system. If you observe any unusual or suspicious activities near our pipeline facilities, or in the unlikely event an emergency occurs, please call us immediately at **1-800-883-3181**.

**HOW TO GET ADDITIONAL INFORMATION**

If you need general information, more information on Pipeline Safety and Integrity or have a non-emergency question, please visit [www.ColoradoNaturalGas.com](http://www.ColoradoNaturalGas.com), call us at 1-800-720-8193, or email us at [PublicAwareness@summitutilities.com](mailto:PublicAwareness@summitutilities.com).

**COLORADO COUNTIES OF OPERATION:**

Adams	Jefferson
Arapahoe	Kiowa
Boulder	Park
Cheyenne	Pueblo
Clear Creek	Summit
Elbert	Teller
Gilpin	

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

**FOR EMERGENCY RESPONSE OFFICIALS**

The following guidelines are designed to ensure the safety of those in the area if a natural gas pipeline leak is suspected or detected:

**Possible actions to secure the area around the leak**

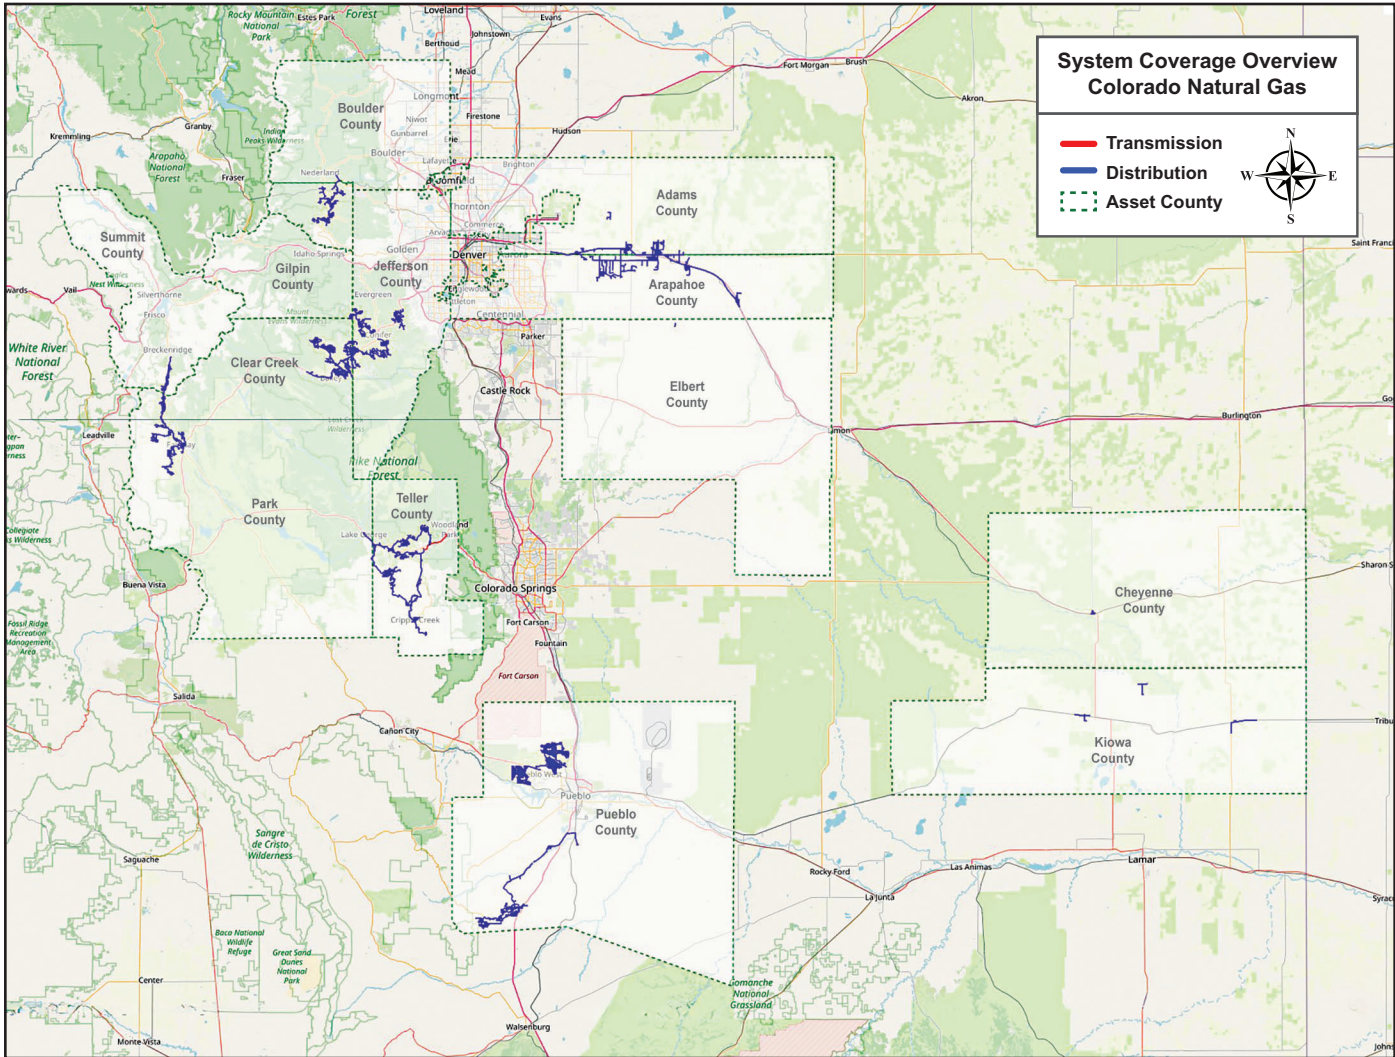

- Evacuating people from homes, businesses, schools and other locations.
- Erecting barricades to prevent access to the emergency site.

**Possible steps to prevent ignition of a pipeline leak**

- Re-routing traffic, shutting off electricity and residential gas supply by qualified individuals.
- Preventing ignition sources from entering the emergency site.
