Energy Transfer, a Texas-based energy company founded in 1996 as a small intrastate natural gas pipeline company, is now one of the largest and most diversified master limited partnerships in the United States.

Strategically positioned in all of the major U.S. production basins, the company owns and operates a geographically diverse portfolio of energy assets, including midstream, intrastate and interstate transportation and storage assets. Energy Transfer, or one of its affiliates, operates more than 130,000 miles of natural gas, crude oil, natural gas liquids and refined products pipelines and related facilities, including terminalling, storage, fractionation, blending and various acquisition and marketing assets in 44 states.

Crestwood is an approximately 3,100-mile gathering pipeline system that transports crude oil, natural gas, and natural gas liquids within the shale fields of the Powder River and Williston basins in North Dakota, Montana and Wyoming and the Delaware Basin in Texas and New Mexico.
