**NEXT WAVE ENERGY PARTNERS**

Next Wave Energy Partners, LP is an independent energy company focused on the development, operation, acquisition and expansion of midstream and downstream petrochemical and fuels assets.

If you observe any unusual or suspicious activity near our pipeline facilities or in the unlikely event an emergency occurs, please call us at any time using one of the numbers listed in this document.

More information on Next Wave Energy Partners can be found at: [www.nextwaveenergy.com](http://www.nextwaveenergy.com)

**HOW WOULD YOU RECOGNIZE A PIPELINE LEAK?**

- **Sight:** Propane vapor is heavier than air, and may collect initially in low areas before beginning to dissipate; Dead or discolored vegetation amid healthy plants; Water bubbling or being blown into the air; Fire or explosion near the pipeline.
- **Sound:** An unusual hissing or roaring sound coming from the vicinity of the pipeline or a connecting facility.
- **Smell:** Any strange or unusual odor in the area of the pipeline.

**WHAT NOT TO DO IN THE EVENT A LEAK WERE TO OCCUR:**

- **DO NOT** cause any open flame or other potential source of ignition such as an electrical switch, vehicle ignition, light a match, etc. Do not start motor vehicles or electrical equipment. Do not ring doorbells to notify others of the leak. Knock with your hand to avoid potential sparks from electric doorbells.
- **DO NOT** come into direct contact with any escaping liquids or vapors.
- **DO NOT** drive into a leak or vapor cloud while leaving the area.

- **DO NOT** attempt to operate any pipeline valves yourself. You may inadvertently route more product to the leak or cause a secondary incident.
- **DO NOT** attempt to extinguish a petroleum product fire. Wait for local firemen and other professionals trained to deal with such emergencies.

**PIPELINE SAFETY**

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help to notify us.

**Always call 811 before you dig!**

Know what's below.  
Call before you dig.

**PIPELINE LOCATION AND MARKERS**

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route.

**EMERGENCY CONTACT:  
1-281-819-1000**

**PRODUCTS/ DOT GUIDEBOOK ID#/ GUIDE#:**

Alkylate	1268	128
Isobutane	1075	115

**TEXAS  
COUNTIES OF OPERATION:**

Harris

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at [www.npms.phmsa.dot.gov](http://www.npms.phmsa.dot.gov).

**EMERGENCY RESPONSE PLANS**

An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding Next Wave Energy Partners emergency response plans and procedures, contact us directly.
